February 2018

Dear RCCS Parent

Rock County Christian School is pleased to announce that it will be holding a summer school program this year for the first time. We are excited about providing this service for your students as they strive to “thrive spiritually, academically, socially and physically”.

The dates, description, deadlines and costs are listed on the back of this letter. As this is our initial venture into this area, there may be some modifications and adjustments to assure that we are doing all we can to make this program a success.

We highly encourage you to consider enrolling your student(s) in this program regardless of their academic standing, as it serves to enrich and bridge the learning gap between the end of school in May and the start of classes in August. Studies have shown that during long summers, students forget many of the lessons they learned from the prior school year -- particularly those children who have limited access to enrichment activities during the summer months. New research suggests that high-quality summer programs can help boost achievement in both reading and math among children who attend such programs regularly.

Therefore, we ask that you prayerfully having your student(s) take advantage for this opportunity regardless of their academic level. For students who find themselves behind or struggling in certain areas of study, especially in reading and math, this program is a definite must.

Please let us know if you have any concerns or questions.

Sincerely

Tim Befus, Head of School
